

Escherichia coli - 19

Official microorganism record

Generated: 23/09/2026, 02:15:22

Field	Value
Id	dba63808-731a-4fdc-8a6f-075583479ac7
Scientific Name	Escherichia coli
Strain Code	-
Source Isolated From	-
Optimum Temperature	-
Min Ph	-
Max Ph	-
Growth Medium	-
Characteristics	-
Enzymatic Activity	-
Researcher Id	-
Experiment Details	-
Date Stored	-

Updated At	2026-09-15T14:18:43.575041+00:00
Taxonomic Information - Genus	Escherichia
Taxonomic Information - Species	coli
Taxonomic Information - Strain Number	19
Taxonomic Information - Is Type Strain	No

Field	Value
Taxonomic Information - Type Of Organism	Bacteria
Taxonomic Information - Ncbi 16s Accession Number	LC880264
Details Of Isolation - Pin	-
Details Of Isolation - Town	Juja
Details Of Isolation - County	Kiambu
Details Of Isolation - Country	Kenya
Details Of Isolation - Village	-
Details Of Isolation - Isolated By	E. Adho
Details Of Isolation - Isolation Date	2025
Details Of Isolation - Gps Coordinates	-
Details Of Isolation - Source Of Isolation	Goat milk
Pathogenicity Information - Is Pathogenic	Yes
Pathogenicity Information - Biohazard Group	1
Pathogenicity Information - Pathogenic To Human	No
Pathogenicity Information - Pathogenic To Plant	No
Pathogenicity Information - Pathogenic To Animal	Yes
Availability Information - Form	-
Availability Information - Is Available	Yes
Availability Information - Received From Other	No
Availability Information - Other Pi Organization	Julia/Zoology
Availability Information - Other Culture Collection Numbers	-
Cbd Information - Pic Taken	No
Cbd Information - Pic Issuing Authority	-
Growth Related Information - Ph Range	7

Field	Value
Growth Related Information - Optimum Ph	7
Growth Related Information - Composition	-
Growth Related Information - Growth Medium Name	Nutrient Agar
Growth Related Information - Oxygen Requirement	Aerobic
Growth Related Information - Incubation Time Days	-
Growth Related Information - Isolation Medium Name	Eosin Methylene Blue
Growth Related Information - Salt Range Percentage	-
Growth Related Information - Subculturing Period Days	-
Growth Related Information - Temperature Range Celsius	35-45
Growth Related Information - Optimum Salt Concentration	-
Growth Related Information - Special Growth Requirement	-
Growth Related Information - Optimum Temperature Celsius	36
Preservation Information - Any Other	-
Preservation Information - Active Form	No
Preservation Information - Mineral Oil	No
Preservation Information - Lyophilization	No
Preservation Information - At 4 Deg Celsius	No
Preservation Information - Preservation In Ln2	No
Identification Information - Api System	-
Identification Information - Identified By	-
Identification Information - Sequence Text	-
Identification Information - Fame Similarity	-

Field	Value
Identification Information - Accession Number	-
Identification Information - Maldi Similarity	-
Identification Information - Biolog Similarity	-
Identification Information - Identification Date	-
Special Feature Information - Reference	-
Special Feature Information - Patent Info	-
Special Feature Information - Important Properties	-
Morphological Identification - Size	-
Morphological Identification - Color	-
Morphological Identification - Shape	-
Morphological Identification - Spore	-
Morphological Identification - Margin	-
Morphological Identification - Capsule	-
Morphological Identification - Opacity	-
Morphological Identification - Flagella	-
Morphological Identification - Motility	-
Morphological Identification - Elevation	-
Morphological Identification - Consistency	-
Morphological Identification - Gram Nature	-
Morphological Identification - Cell Morphology	-
